PROFESSIONAL SUMMARY

My goal is to work on UX design and Web development.
I looked into the courses of many Universities to achieve my goal.
I think Yoobee's Diploma in Web and UX design (level6) course is the best choice for me.
I recently obtained relevant certificates for employment as UX Designer and Web Developer and have basic knowledge and skills related to UX Design and Web Development.
I know how important teamwork and time management are while doing various jobs in the past, and I think that is my strength. Also, I studied 3D graphics in South Korea, so I have advantages in video editing and 3D graphics.
